GHL Expert Vetting Task for Conek

Objective: To assess your proficiency in GoHighLevel (GHL) and your strategic approach to lead management for our chiropractor clients.

Company: Conek (conke.io)

Industry: Marketing for Chiropractors

Lead Sources: Meta Ads, TikTok Ads

Goal: Convert ad-generated leads into booked appointments.

Scenario

You have been assigned a new chiropractor client, "Wellness Chiropractic Clinic." They have just launched a new campaign on Meta and TikTok offering a "Free Consultation & Posture Analysis."

A list of 10 new leads has just come in. The client is new to GHL and needs you to set up the initial system for handling these leads and to propose a strategy for maximizing booked appointments.

A sample of the leads is provided in a CSV format below. Your task is to use this information to complete the challenges.

Sample Leads (`leads.csv`):

Your Tasks

Please complete the following tasks within a GHL sandbox/demo account. Document your work with screenshots and provide written explanations for your strategic choices.

Task 1: GHL Setup & Customization

- **Create a Custom Field:**** Create a new custom contact field named "Posture Concern Level" with a dropdown selection: "Low," "Medium," "High." Explain why this field would be valuable for a chiropractor.
- **Import Leads:**** Create a new contact list named "New Leads - Wellness Chiropractic" and import the 10 sample leads provided.

Task 2: Lead Nurturing & Booking Automation

1. **Create SMS & Email Templates:**

- * Write a compelling and high-converting **initial SMS** to be sent to a new lead immediately after they sign up.
- * Write a follow-up **email** to be sent 24 hours after sign-up if the lead has not yet booked an appointment.
- * **Explain the psychology** behind your copy and why it's effective for the chiropractic niche.

2. **Build a GHM Workflow:**

- * Create a new workflow named "New Lead - Chiropractic Consultation."
- * The workflow should trigger when a new lead is added to the "New Leads - Wellness Chiropractic" list.
- * The workflow should perform the following actions:
 - * Send the initial SMS you created immediately.
 - * Wait 24 hours.
 - * Use an ``If/Else`` condition to check if the contact has booked an appointment (you can simulate this with a tag like "Appointment Booked").
 - * If they have **not** booked, send the 24-hour follow-up email.
 - * If they **have** booked, send a confirmation SMS and add a note to the contact record: "Appointment booked via initial workflow."

Task 3: Strategic Analysis & Reporting

- Lead Qualification:** Based on the sample leads, how would you prioritize them for a manual call from a CHM expert? What criteria would you use, and why?
- Objection Handling:** A lead replies to your SMS: "I'm not sure, I've never been to a chiropractor before and I'm a bit nervous." Write your exact response to this lead to build trust and encourage them to book.
- Performance Dashboard:** Describe the key metrics you would put on a GHM dashboard for "Wellness Chiropractic Clinic" to show them the value Conek is providing. List at least 5 metrics and explain why each is important.

Deliverables

Please provide a single document containing:

- Screenshots of your GHM setup (custom field, workflow, etc.).
- The copy for your SMS and email templates.
- Written answers to all questions in the "Strategic Analysis & Reporting" section.

Good luck! We look forward to seeing your expertise in action.
